

known inputs: predispatch, PD PASA, gas, calendar, history

(a) Inputs at origin t

72-h price history

AEMO predispatch price, next 24 h

PD PASA net load, next 24 h

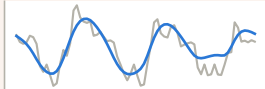

(b) Dual-field decomposition

detected events $\rightarrow$ DGF

remainder $\rightarrow$ CTF (trend)

DGF heads

events, scarcity

CTF heads

level, net load

(c) Base, calibrator, fusion

Linear base

all inputs

Cali-brator

per-hour MLP

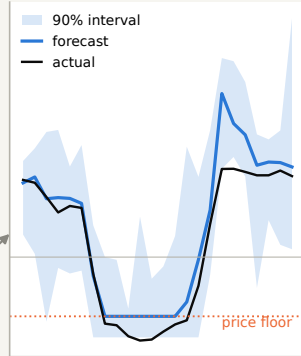

Fusion

base + CTF + $\sin^2\theta \cdot \text{DGF} + \text{cal.}$

(d) Floor and forecast

24-h forecast (QLD, 01 Oct 2023)

90% interval
forecast
actual

(e) Refit before every test quarter k (2023Q1-2024Q4)

train: 2015 to three months before quarter k

validate

test k

$k+1 \rightarrow$
